## EXPERIENCE

**Dfuse Technologies**

Helpdesk Specialist I (Application Support) 2026

• Provide Tier 1 technical support for Military Health System users, troubleshooting hardware, software, application, and account access issues.

- Manage and resolve incidents through a ticketing system, ensuring accurate documentation, prioritization, and timely resolution.
- Escalate high-priority and complex technical issues to appropriate support teams while maintaining ownership and follow-up.
- Communicate technical solutions clearly to non-technical users, delivering high-quality customer service in a fast-paced environment.
- Document troubleshooting procedures and resolutions to support knowledge management and continuous process improvement.
- Investigate authentication, account access, and security-related issues, following established incident response and escalation procedures.
- Collaborate with cross-functional IT teams to support secure and reliable operations within a Department of Defense healthcare environment.

Helpdesk Specialist II (Desktop Support) 2026-present

- Provide Tier II desktop support for Military Health System users, diagnosing and resolving complex hardware, software, operating system, and network connectivity issues in a secure enterprise environment.
- Administer Active Directory user and computer accounts, including account provisioning, password resets, account unlocks, group membership, and Group Policy troubleshooting.
- Manage and troubleshoot Microsoft 365 services, including Outlook, user account configuration, email access, licensing, and synchronization issues.
- Remotely support end users using Bomgar, performing in-depth troubleshooting and resolving escalated incidents while minimizing downtime.
- Investigate and resolve VPN, BitLocker, authentication, and Windows login issues, ensuring secure access to Department of Defense systems.
- Manage incidents through ServiceNow, documenting root cause analysis, technical resolutions, and collaborating with infrastructure, application, and cybersecurity teams to resolve complex issues.
- Deliver exceptional customer support by communicating technical solutions clearly to users of varying technical backgrounds while consistently meeting service level objectives.

- Manage incidents through ServiceNow, documenting root cause analysis, technical resolutions, and collaborating with infrastructure, application, and cybersecurity teams to resolve complex issues.
- Deliver exceptional customer support by communicating technical solutions clearly to users of varying technical backgrounds while consistently meeting service level objectives.

## EDUCATIONAL BACKGROUND

**University of Wisconsin Madison**
*Bachelor of Science 2018*
**Sichuan University**
*Chengdu, China 2016*
**Santa Reparata International School of Art**
*Florence, Italy 2018*

### DevOps/ Application Development intern

*Tech G Labs 2025-2026*

- Supported development, infrastructure, and testing of web and mobile applications, including ServIndy (local service platform) and Backwood (mobile community application).
- Assisted in identifying, troubleshooting, and regression testing application issues to improve reliability, performance, and quality assurance outcomes.
- Collaborated with cross-functional teams on feature updates, database-related tasks, and deployment pipeline processes to maintain system functionality.
- Contributed to technical documentation and adherence to operational and development best practices.

### AI Model Evaluation Contributor (Contract)

*Outlier 2025-2026*

- Evaluated and refined AI-generated technical responses for accuracy, clarity, and policy compliance
- Reviewed security-related and technical content to ensure alignment with industry standards and best practices
- Applied analytical reasoning to assess complex problem-solving outputs
- Maintained strict confidentiality and quality control standards in a fast-paced remote environment

### Financial Assistant

*Sage Point Financial 2022-25*

- Supported daily operations in a highly regulated environment, maintaining strict adherence to documentation, compliance, and procedural standards
- Digitized, organized, and maintained 500+ client records with high accuracy, ensuring rapid retrieval and audit readiness
- Performed precise data entry and verification across multiple software systems, minimizing errors and maintaining data integrity
- Managed task prioritization and time-sensitive workflows to meet internal SLAs and operational deadlines

### Production Manager

*Johnson Brothers Coffee Roasters 2023-25*

- Managed daily production operations in a fast-paced, process-driven environment requiring consistency, safety, and quality control
- Oversaw physical handling, labeling, packaging, and delivery of products, ensuring accurate inventory tracking and order fulfillment
- Trained and supervised team members on standardized operating procedures, equipment use, and safety practices
- Coordinated cross-functional workflows (production, logistics, wholesale, and e-commerce) to ensure on-time delivery and operational continuity

### Premier Concierge

*Mansion Hill Inn, Trek Bicycle 2022-23*

- Operated in a 24/7 service environment requiring professionalism, accountability, and precise communication across shifts
- Executed detailed task handovers and coordinated with team members to ensure continuity of operations and service standards
- Served as a trusted on-site point of contact, enforcing organizational standards while supporting staff and guests
